## IDRACER 548/10

PRE BOTTOM

### USE

---

**IDRACER 548/10** is a slightly cationic product with high leveling and sealing properties, designed to be used as a pre-primer to reduce absorption in rolled applications, in plate finishing and in addition to deep grooves.

After the sanding operation, the surface appears very compact and smooth with a medium-bright appearance. It is normally used in combination with KP pigments.

To obtain the best result, we suggest dilution with water in the ratio 1: 3.
