IDRADDE 876

RHEOLOGY MODIFIER

IMPIEGO

IDRADDE 876 is a rheology modifier based on polyurethane resins. It is used in aqueous mixtures to regulate and stabilize viscosity and due to its relaxing ability improves film formation. Its thickening power acts regardless of the pH of the mixtures. is a rheology modifier based on polyurethane resins.

It is used in aqueous mixtures to regulate and stabilize viscosity and due to its relaxing ability improves film formation. Its thickening power acts regardless of the pH of the mixtures.

DATI CARATTERISTICI

APPEARANCE	: Viscous liquid
SOLIDS CONTENT	: ca. 32,5%
PHASE	: Aqueous
STORAGE	: 12 months 5- 35°C Protect from frost
NOTES	: Shake well before use
