IDRASTU L292/6

BINDERS AND FILLERS IN AQUEOUS DISPERSION

APPLICATION

IDRASTU L292/6 is a paste product designed to mask the surface defects of leather such as scratches, brands and others.

It is generally applied as a spatula before grinding or on previously frosted leathers that after application will be re-frosted in order to remove the excess product.

The results are to obtain a very smooth and uniform surface ready to be finished for bottalabile printed leathers.

The main characteristics of the IDRASTU L292/6 are an excellent adhesion and retention of printing, and keeping the elasticity of the leather unchanged, it has an excellent resistance to yellowing and is also easily frosted.

It is used for the production of correct-flowered leathers, printed and soft bottalati such as buffaloes or large cows, for furniture or clothing.

PRODUCT CHARACTERISTICS

APPEARANCE	: Whitish paste
TYPE	: Putty in aqueous dispersion.
SOLID CONTENT	: c.a. 29%
SPECIFIC GRAVITY	: 0,70 g/cm ³
pH	: 8,0-10,0
STORAGE	: 12 months. 5-35°C.
NOTE	: Shake well before use.

All information is given in good faith but without warranty and we cannot accept responsibility or liability for any damage.
